

SEMMANTICS 40 SPEAKERS

Our very own member, Peggi J. Tabor, Ph.D., will talk about “The Science of Happiness”. Multiple members who have heard Peggi speak, have said, “You just have to get her to speak”. Although she usually charges a professional fee, Peggi will speak at SEMMantics as a gift to SEMM.

Dr. Tabor’s talk will look at recent studies on happiness. Attendees will leave with a tool kit of both psychological and physiological behaviors designed to increase and maintain their experience of happiness.

Caleb K. Collier is a Vice President of Collier Financial of Ann Arbor. He is a frequent speaker for a firm that specializes in financial education. Several of our members who have heard him talk were impressed at how he makes financial planning understandable, even if you are not particularly a numbers person. He usually speaks at conferences, and to clients, but he is coming to talk to us purely as a financial educator.

Mr. Collier will bring information on common sense strategies to wealth accumulation. He will cover simple ways to create and grow wealth and distribute it in the most tax advantageous manner while living and at death. What has changed with the new tax code and what has not? He will bring a lot to think about, whether you are still working or already retired.
